# NEARLY GONE – CAN YOU HELP?

Awesome animals are dying and they need your help!

By Cyrus Rinkevich, Zarah DiCicco, & Melyssa Burns

---

Have you ever wanted to swim with the dolphins or watch whales from the beach? Well, these incredible animals are going extinct and they need your help! Here are 3 endangered species and here's how you can help them:

## 1. The Vaquita porpoise

The Vaquita porpoise, which is also called the “little cow” in Spanish, is the most endangered marine species on the planet with less than 30 of this species left alive. The Vaquita porpoise is found in shallow waters along the Gulf of California. They became endangered because they got caught in gillnets by fishermen. Gillnets are nets that are left out and hung vertically so fish get caught by their gill; gill nets also catch all marine life like the Vaquita porpoise. Action is already being taken to help this endangered species. In April 2015, the Mexican government announced a two-year ban on gillnets. Just a year later, in 2016, the two-year ban was extended to a permanent ban. They also banned night fishing and used the Mexican Navy to enforce these rules. However, the Vaquita porpoises' decline is unlikely to stop immediately.

## **2. The Hawksbill turtle**

The Hawksbill turtle is the most critically endangered sea turtle species. They are endangered for many different reasons. One is that the beautiful pattern of their shell is desired for jewelry, fashion, and accessories. The other reason is because the turtle's meat and eggs are considered a delicacy in many cultures. However, eating this turtle's meat is very detrimental for humans as it can cause many health problems and possibly even death. One way to help this endangered species is by protecting the sea turtles in nesting beaches and marine environments. We can also help by trying to reduce the effects of littering and pollution in the ocean so these animals don't get strangled by trash such as grocery bags, soda rings, fishing lines, and more.

## **3. Hector's dolphin**

The Hector's dolphin is the rarest marine dolphin in the world. These incredibly rare dolphins are found off the North Island of New Zealand. The main threat to their survival is getting caught in commercial fishing nets, particularly gillnets. The only way so far to help these dolphins is doing our best to get rid of commercial and recreational gillnetting and trawling across the species range. Many have been trying to get a New Zealand-wide ban on gillnets to help these endangered dolphins.

Some ways we can help these animals are by helping to ban gillnets, keeping the ocean and the surrounding environments clean, and trying our best to protect nesting sites and the areas where baby endangered animals live. If you want to help these animals, maybe you can volunteer to help pick up trash on the beach and in the nearby environments. You could also contact an organization that helps these animals and ask what you can do.

Now that you have seen these beautiful endangered animals, don't you want to do your part to help them? If we don't do our part to help these animals, they will soon be gone forever. These animals are nearly gone – can you help them?

Poll: If you could own one of these animals, which one would you want?

# VIDEO GAMES

By Alex Carasquillo & Francesco Fronza

---

Here is our editorial on video games where we will give you our thoughts on video games, their art style, their graphics, and the consoles they're sold on

**Xbox or PS4:** Me personally, I think the PS4 is better than Xbox because the performance of the console is better. Sure, the Xbox might be able to have more players than PS4 but the Xbox can not match the capabilities of the PS4. The PS4 has better graphics, more free space, and is better with visuals, the PS4 is also better and faster with loading and smoother animation, Enough about the PS4, let's talk about the Xbox. Sad to say but the Xbox has more downs than ups, like clunky TV integration, no media playback from USB, and uninspired design. Kinect voice commands are unreliable, no rechargeable battery in the controller, etc.

But let's stop talking negative and talk about the ups to the Xbox: excellent user experience, comfortable controller, sophisticated voice control, strong launch lineup, and "Snapping" video apps perfect for multitaskers. Kinect voice commands can be powerful. Switching between apps is fast and snappy. Upload Studio is a great little clip editor. TV pass-through is lag-free and easy to use.

The PS4 isn't the best though there are some down to it like: they overheat all the time. They also make jet noise. Their buttons on the ps4 always get stuck. The PS4 does not have good deals on its bundles. Their controllers are tearable over time. The batteries get slower and slower until you will have a charger in your controller all the time because the battery won't charge. "They are overpriced, that's why I will never buy a PS4 ever again." – Francesco

So what do you think? PS4 or Xbox: which one do you think is better?

Minecraft is one of the best games out there where you can play multiplayer. The new Xbox Series X with this game will be amazing. CarX Drift Racing is one of the best car games out there where you can drift and pick your car. Forza Horizon 5 is a cool car game where you can go off-roading and do all sorts of things. Those are all of the best games for Xbox.

Minecraft has the best graphics for PC and Xbox. It's super fun to play with your friends on Minecraft. Minecraft has a cool setting page where you can buy all of your packs and skins. You can also change how your games look in your settings and if you have extra controllers you can play multiplayer. Minecraft is cheap and maybe you can get it for free from a friend. Minecraft has free packs and free skins. Minecraft is perfect for anyone and is very fun to play with your friends game. That is all the details about Minecraft.

CarX Drift Racing is a very fun game to drift in and there are a lot of cars. This game has a lot of cheat codes

# KHLOE KARDASHIAN GONE WILD!

By Hope Sobel-Hontz

---

## KHLOE KARDASHIAN JUST HAD HER BABY!

Who is Khloe Kardashian? I'm sure you may know her but if you don't, Khloe K. is a part of a family called "The Kardashians." She is one of Kris Jenner's and Robert Kardashian's children. Khloe K is the third oldest Kardashian out of the four. Khloe Kardashian is a model, actress, and businesswoman. The Kardashians have their own reality TV show, featuring the whole Kardashian crew and their sisters, Kris Jenner's children Kendall and Kylie Jenner.

On August 5th, 2022 Khloe Kardashian had her second baby. It's a baby boy and they are keeping his name private. All she said is that it starts with a T.

Khloe Kardashian welcomed her baby with her ex Tristan Thompson. Did I say "EX???" Yes, I did. Days before Khloe gave birth Tristan Thompson cheated on Khloe. Both Khloe K. and Tristan T. welcomed their child via surrogate. They wanted to avoid any health risks by using a surrogate.

Khloe K. used a surrogate for medical reasons. If she were to get pregnant, it would be a high-risk pregnancy for her and the baby, this meaning she could get really hurt or even die.

# 2022 NFL DRAFT'S BEST PLAYERS, SO FAR

By Boston Freese and Joseph Reyes

---

The players we think are the best from the 2022 NFL draft, so far, are Aiden Hutchinson, Ahmad “Sauce” Gardner, and Jahan Dotson.

We will talk about Aiden Hutchinson first. Aiden Hutchinson went as the 2nd overall pick in the 2022 NFL draft. Aiden Hutchinson plays defensive end for the Detroit Lions and his number is 97. Aiden Hutchinson went to the University of Michigan for football. We think he's one of the best defensive rookies because of how he has 3 sacks and that's really good for a rookie. When we watch him play we can see the adjustments he makes when the coach makes a bad play call. When he gets double-teamed, he gets around them faster and more consistently than most players. He also makes the defense better when he gets them hyped up before the game. Even if it's the best team in the league they think

they can win, so far the lions are 1-4, and watching the defense play, they just look a lot better with Aiden Hutchinson but it is not a one-man defense and they're all playing really well.

The picture of Aiden Hutchinson is from Pride of Detroit.

Now we will be talking about Ahmad “Sauce” Gardner but we will just call him Sauce Gardner because that's what most people call him. Sauce Gardner went as the 4th overall pick in the 2022 NFL draft. Sauce Gardner plays cornerback for the New York Jets, he wears number 1. Sauce Gardner played for the University of Cincinnati in college. We think he is one of the best defensive rookies

because he held Ja'mar Chase, who was Offensive rookie of the year last year, to -2 yards and 0 touchdowns. To go against a really good wide receiver and be able to hold him to -2 yards is really good. He did not allow a single touchdown in college and so far has not allowed one in the NFL. The Jets are currently 3-2 and Sauce Gardner has been playing really well especially not allowing a touchdown. Also how he doesn't get beat by every wide receiver when he plays. Again this defense is a lot better than last year and I think Sauce Gardner could get Defensive rookie of the Year. This is a picture of Sauce Gardner from ESPN.

Lastly, we will be talking about Jahan Dotson. Jahan Dotson went as the 16th overall pick in the 2022 NFL draft. Jahan Dotson plays wide receiver for the Washington Commanders, he wears number 1. Jahan Dotson played for Penn State in college. We think that he is one of the best offensive rookies from the 2022 NFL draft because of how quick and athletic he is. He also runs really good routes and scored 4 touchdowns so far in the NFL. He has more touchdowns than Tyreek Hill, Tyreek Hill is a really good and really fast wide receiver. Tyreek Hill has only 2 touchdowns while Jahan Dotson has 4 touchdowns. The Washington Commanders are 2-4. Jahan Dotson was a good addition in the offseason by the Commanders because he's a really good wide receiver. This is a picture of Jahan Dotson from Sports Illustrated.

# WHEN IS IT NOT OKAY?

By Joseidys Maldonado & Xiomara Alfaro

---

Do you feel safe when you're alone? What can happen when you're alone? Stranger danger, that's what could happen. A simple hi from someone you know or even a stranger could turn into something traumatizing. Go with your gut feeling, anything could turn into anything.

Do you think it's a joke or that we're saying it just to say it? Well no. This is all real-world stuff sadly. A lot of scary things happen to a lot of people and sadly Brenda (not real name) had to go through that. Brenda was a teen when it happened to her. It gave her nightmares for weeks and traumatized her really badly. She wants to warn people to pay attention to their surroundings and to always be careful, also to always go with your gut feeling you never know just because someone says something doesn't mean it's true.

Still think it's a joke? Look, even family can't always be trusted. Scarlett (not real name) lived with her uncle for quite some time. He would take Scarlett to a room and accuse her that she did something wrong. And that she deserved to be punished. And crazy horrible things happened after that. He told her not to say anything because no one would believe her. She acted like she was okay when in reality she was dying inside to tell someone. She finally said something; they believed her and did everything to help her. What Scarlett has to say is always tell a trusted person. Even if they threaten you it's better to tell a trusted adult they will believe you and help you.

Look at this data if you still don't believe us. There are about 388 pedophiles, if not more just here in Reading. That makes up about 80 to 90 percent of sex offenders, over 45 men get caught a year! There are about 750,000 registered pedophiles in the USA. Over two-thirds of offenders who were reported committing intent also reported that they assaulted victims outside of the family.

So you see this is not a joke, it's something serious and we need to take care of one another. Tips on staying safe include always letting someone where you're going. Carry pepper spray or a glass breaker, if you can, just not on school grounds. Always share your location with someone you trust and if something seems off remove yourself from the situation or tell a trusted person. Try not to go out alone. If no one can go with you then Facetime someone and always keep your doors locked. If you see something on your car that you didn't put there DON'T touch it because it might have something on it that could lead to bad things.

In conclusion, always pay attention to your surroundings no matter what. Try not to be alone, and always go to a trusted person. Remember not everyone is who they say they are. And GO WITH YOUR GUT FEELING!!! And anything could turn into anything even a simple hi from anyone could turn into something scary. We're not trying to scare you, just trying to help and keep you safe.

Shoutouts to the following: Mrs. Lebo, Mr. Heck, Mrs. Yochum, Dr. Stern, Mrs. Runyon, Mrs. Patterson, Omarys, Alianys, Genesis, Aryez, Xavier, Joseph R, Joseph.M, Jonovan, Sarahlynn, Hope, Angela, Alex, Francesco, and Zarah for the ideas and comments!

# THE GIRLS' BATHROOM

By Genesis Figueroa

---

Did you know the girls' bathroom doesn't have any feminine products? There isn't one single feminine thing in any girls' bathroom. I think this school should invest in feminine products because girls get into accidents and cannot be able to go all the way to the nurse's office. I honestly believe it would improve our school. Feminine products should be in ALL girls' bathrooms because it's a necessity especially when it pops up unexpectedly. It used to be one of my biggest fears as a 7th grader.

My source Future Ready PA Index has informed me that girls are 47.2% in this school. Like many girls in this school, we all have been in a situation where we have been in an accident in the bathroom. I asked the nurse how she felt about my article; she agreed with me. Alyzah, my cousin, has been through the same struggle as most of these girls. If our school invests in the box of feminine products in the girls' bathroom I think it should be free. I think it should be free because not everyone brings a dollar or a quarter around with them and it just isn't right to pay for a necessity.

I've asked many girls who get their period during school and they've told me their stories. This wouldn't happen if the school would invest in a period box in the bathroom; it's not going to be a waste of money. I know most of the girls will be using them wisely, I just think this improvement could do so much for us girls. I've asked 20 girls in this school if they ever have gotten an accident and most of them have said they have.

For example, in Scotland, all feminine products are accessible in schools and in stores, all you would have to do is just get them. There are 17 states where they have period boxes. Something like the picture would be fine. Little improvements could do a lot. We could improve the box every other year or every year.

I talked to Dr. Stern on October 13th; she is going to consider the improvement in the girls' bathroom. The only thing we are worried about is the 7th graders being very immature, especially if the boys get ahold of one of them. But, as far as I know, she's considering it!! I'm so glad she considered my suggestion.

# CAN LUNCH BE BETTER?

By Omarys Velez Garcia and Alianys Velez Garcia

---

People in this school believe that the school lunch should be free. It hasn't been free since June 30, 2022. A lot of students don't eat lunch because of that reason. Some people pack lunch but there are a lot of people that don't pack lunch because of personal reasons.

The only way you can get school lunch free is by filling out a paper but only if your parent qualifies for it. If your

parent has a high salary you don't qualify for free lunch. I think it is unfair because we as students can't control how much our parents get paid and because if they get a high-paying job we as kids can't get free school lunches.

Students think there should be more options to drink, for example, water bottles. There are people that don't drink milk. For that reason, I think we should have the choice to choose water bottles. You can buy iced tea and other drinks for a dollar but they should give us the water bottle for free because the school water is warm and tastes terrible.

People don't like corn dogs; they think they should take them off the menu. They think that the bread is not healthy and it has no flavor. Corndogs have 430 calories, total fat of 19, and sodium of 973mg, that is how much sodium we should eat in a day. People think they should replace it with better tacos, burritos, empanadas, and chicken tenders.

This is what the students think about school lunches. I think we can do better for the school lunch. If we do better, more students will eat school lunches.

Photo:

<https://www.ksat.com/news/local/2022/08/01/school-lunch-wont-be-free-for-many-this-year-heres-how-to-find-out-if-you-qualify/>

# HOME ECONOMICS

By Jeremiah Smith, Luis Barbosa-Rodriguez, and Jonovan Gonzalez

---

Do you think home economics should have been canceled? We believe that home economics shouldn't have been because some kids need to learn how to cook. It also teaches you how to use some kitchen tools and stoves.

In home economics, the students could learn about cooking and working in a kitchen. Food Scientists/Technologists are involved with home economics. Food Scientists are experts on food's biological, chemical, and physical makeup, and how food can be processed, stored, and preserved. Food Technician, Dietitian Nutritionist, Catering/Restaurant Manager, Hotel Manager, Domestic Services Manager, and Chef are jobs that involve home economics.

Home economics is a class to empower children by teaching them how to cook. If you teach kids how to cook, they will be able to cook for themselves if they rent an apartment. If they can't cook when they grow up it will cause problems for them. They are growing and learning, so you must teach children to cook at a young age.

It makes you learn to cook good food for your friends and family so when you give your family food so they won't die. You can make tasty foods and can see how bad you did and can fix your food. You can eat unhealthy and healthy food because you made it. As you see, schools need home economics to teach kids how to be proper adults. It can help them in the future.

## **INTERVIEWS**

### **DR. STERN**

#### **Why were home ec classes canceled?**

"We have a limited budget. We get money from the federal government mainly from the state government and from taxes of the people that live in the community so sometimes we have to decide on the programs that we're going to offer. We felt that we needed another science teacher because more of our students were interested in science electives than they were in the family consumer science electives. So we have to make a decision that was in the best interest of her students and we added another science teacher."

#### **Do you think home ec classes will come back?**

"At this point, I don't think that we will add that program back, I think that students who want to go into the culinary field will go to BCTC as sophomores and go on to the certifications there. I think that since we have distributed that information in other classes, and students are getting that education in other classes, I do not see the program coming back."

**Will you like it if home ec comes back?**

"I would love to have enough money to offer many different things including some of the family consumer science classes, but the reality is that all schools are on limited budgets and we have to make do with the money that we have, so we have to put the needs of our students first. We have to sometimes make decisions about what best meets those needs. There are a lot of other programs that I would love to be able to offer and maybe at some point we will."

**Do you think learning about nutrition and all the other stuff like that is as important as the other stuff you learn in health class?**

"I do. I say nutrition is a very important part of both health classes, 8th grade on through high school health classes, and I know that the teachers incorporate units of nutrition and good eating and self-care into both of the health classes. You'll learn more about that in 11th grade health class than you will in 8th grade, but you will still learn and get some of that in 8th grade as well."

**JOLEIRY BARBOSA-RODRIGUEZ****Why did you take home economics?**

"I was assigned to it."

**What year did you first take it?**

"It was 2021 last year."

**What was it like?**

"It was fun, it was easy, fun to cook."

**Do you still use that information?**

"I only use the information for cooking."

**NATE COLLIER****Why did you take home ec?**

"I choose to take home ec because it seems like a class that would prepare me for my future in a non-academic sense."

**What year did you first take it?**

"I took home ec starting in 7th grade and I took it every year from 7th to 10th."

**What was home like?**

"I enjoyed it. I was able to learn practical skills such as cooking, finances, and parenting."

**Do you still use that information?**

"The skills I learned in cooking help me almost every day whether I'm cooking or picking ingredients out at the store."

**Do you like that class?**

"It was a class that I feel prepared me to feel confident and independent in Life After High School."

**Is it something you want to keep learning?**

"I recommend for myself and everyone to pursue skills covered in home ec. there is so much more to deal with often high schools with home ec deal with."

**LUCAS VASQUEZ**

**Why did you take home ec?**

"I took FCS in 8th and 9th grade because it was a requirement for graduation."

**What year did you first take it?**

"I took FCS for the first time in 2020/8th grade."

**What was it like?**

"FCS was an enjoyable class where we learned a lot of important skills for life."

**What type of stuff did you learn in it?**

"We learned how to cook, make a resume, budget money, etc."

**Do you still use that information?**

"Sometimes, I hope it'll be more important once I'm 18."

**Did you like that class?**

"I did like the class. I thought it was enjoyable and important while also being laid back at times."

**What information is useful for other things?**

"Yes, the cooking part I still used today and the other stuff I will use later in life."

**Is it something you want to keep learning?**

"I took all of the possible classes for FCS, so I am learning. But I think it is important for other students to take these classes."

# KARDASHIAN CATCH-UPS

By Sarahlynn Rothermel

---

A variety of celebrities compare one another to each other. Each celebrity competes to see who has more money, the better fashion, or the prettier house but it all comes down to one thing..the drama. And who has the drama? The Kardashians. Continue reading to find out more about the

Kardashians and their problems, their drama, and the latest news about them.

We all know Kris Jenner has a big lineup of children such as Kylie Jenner, Kim Kardashian, Khole Kardashian, Kourtney Kardashian, Rob Kardashian, and Kendall T. Jenner. Four out of the six girls have the same father but the other two don't. Kylie and Kendall's father Bruce Jenner recently came out as transgender in 2015 four months after she finalized her divorce from Kris Jenner.

Today Bruce goes by Caitlyn Jenner. She starred in her own reality television series called "I am Cait" which focused mainly on her gender transition. Caitlyn is still running her company called "Bruce Jenner Aviation" which is a company that sells aircraft supplies to corporations and executives.

On the other hand, Kim, Khole, Kourtney, and Rob all came from the same father, Robert Kardashian. Robert and Kris Kardashian had their four children together during the years 1979-1987 and a few years later their father died in 2003 on September 30th in Los Angeles CA. Robert was a businessman and gained recognition as O.J. Simpson's friend and defense attorney during O.J.'s 1995 murder trial that was held in court because that incident made the Kardashians more famous than they already were. Another climb to fame was when Kim and Ray Jay's explicit tape was released. The family and couple at the time said they had no clue about how the tape was released, but recently Ray Jay has come out to say that it was Kris Jenner's idea to release the tape.

At the moment Kim is 41, Kourtney is 43, Khloe is 38, Kylie is 25, Kendall is 26, and Rob is 35 and they all have successful companies and lines of things they have created and are still doing.

Kris Jenner is the CEO of her own company called Jenner Communications. Kris manages her children Kim, Khloe, Kendall, Rob, and Kylie's careers. Kris supports a number of charities for

example; Brent Sarpino's Foundation for Drug Awareness, The American Red Cross, The Salvation Army, Children's Hospital of LA, and Smile Train.

Kim has Kim Skimss which is a clothing line, she has Skky partners, and she financially backs people who are starting their own businesses. If you think that's all, you're wrong! She also has a perfume called Kim K eau de perfume, which opened her up for KKW Beauty and Fragrance. Kim started a successful jewelry line called Belle Noel. She started ShoeDazzle which is shoes, handbags, and yes more jewelry. If you're lucky you can get your hands on the game Kim K Hollywood which you can buy on the app store.

Next up we have another entrepreneur Kylie Jenner! She has Kylie Cosmetics which is an extremely successful makeup line, she has the Kylie Baby shower line, and she has Kylie Skin. Along with her prevailing skin line, she also has Kylie Swim which is you guessed it all bathing suits. Kylie wrote a book with her sister Kendall called *Rebels: City of Indra*. You can find Kylie and Kendall's game called Kendall and Kylie in the app store as well.

Kourtney Kardashian owns Lemme which is a vitamin and supplement line. Kourtney also owns Posh which is a lifestyle and wellness blog on Instagram!

Kendall Jenner created 818 Tequilas from family-owned farms in Mexico, she also owns the teeth-whitening toothpaste and whitening pen called Moon. Moon is very appealing to customers due to it being fully vegan made.

Rob Kardashian has his hot sauce called Grandez. He also has a sock company called Arthur George Socks. His mother Kris also co-owns after he almost ran the company in the ground.

Khloe created her clothing line called Good American which started as a sustainable denim pants line but is continuously growing into more. Khloe has a perfume called Unbreakable Bond which she made with her ex-husband Lamar Odom, sadly that was a failed attempt and it did not last long.

There are many other businesses that they did alone and as a family that have failed but the ones I listed are what they are mainly known for.

The Kardashians, like all families, have a lot of drama! They do have a few things that they try so hard to keep private. But in reality being in the public eye constantly makes that almost impossible. Everyone knows all their problems, drama, and everything that is going on in their life. You can learn even more about the Kardashians on "Keeping Up with the Kardashians" and "The Kardashians" on Peacock, and Hulu.

# ANTIETAM NEEDS CHANGE

By Joseph Moron-Zarza and Hao Nguyen

---

In this article, we are going to talk about school changes and things that might need modification.

The first idea is classroom changes. In this idea, we're going to talk about things you can add to rooms, new rules in the classrooms, and most importantly the teacher's new rules.

Our second idea is the cafeteria. The food should have better quality, but in exchange, it will cost more money per meal.

Our third idea is overall changes to the school, like the rules. Many students don't enjoy using SmartPass and feel like it's very stressful and complicated.

Our fourth idea is the school's mechanical parts. In this idea, we are going to talk about the air conditioner. There should be more engineers for unexpected occurrences.

## HOW TO CHANGE THIS?

To improve classrooms, we need better management, adding posters to the rooms for more learning spirit, and overall better teacher rules, for example, teachers letting their students have access to their cell phones after a requirement is met. These changes are going to affect how these new teachers are going to teach their students and might result in better or worse teaching skills. As for the work, students should have less work, more learning time, and a little bit of phone time.

The cafeteria would be better with cleaner tables, better lunch, no more last name seating charts, and more lunchtime because the waiting takes half of the time we have in lunch away. There should be more supplies to heat your food rather than just a microwave, like an air fryer. Food will cost more money in exchange for all of these new additions.

To improve SmartPass, when a student goes overtime as required, they get 20-50 seconds off every time they're late. Sometimes students use their phones for SmartPass. If students use their phones for a SmartPass, they're required to have their phones kept by the teacher while

they are gone. Here is another idea: there should be an arrow in the hall that points to a specific side to walk on. It should also be included in the stairs.

The staff should be alerted right away when the mechanical parts are acting up. There should be a camera monitoring the area. Like the other day, when the air conditioning wasn't working properly, barely anyone was alerted by that, so most of the classrooms were burning hot. We should change how people are going to fix it and should be prepared.

So our conclusion is that the student council or higher-ups should have a way for students to suggest new ideas/changes to the school, which could help make our school of Antietam more fun and awesome. To suggest ideas, a student has to suggest an idea. By having a small piece of paper with their idea written on it, students should be able to vote if this change should be added. It has to be approved by the higher-ups in order to be put in the vote. There would be less of a problem if this has happened.

# ALL THE DRAMA

By Angela Duran Gomez

---

Did you know that there is so much drama with celebrities all over the world and that most of these celebrity dramas are with celebrities that most of you may know? Well, you are about to see what goes on in the lives of these celebrities.

We are going to start off with Hollywood star Blake Lively confirming her pregnancy and slamming the paparazzi for freaking out her kids. Hollywood star Blake Lively is expecting her fourth child with her husband, Ryan Reynolds. Lively got very angry when the paparazzi showed up at her house to get pictures of her and her kids. Personally, I would not accept the type of disrespect that the paparazzi is giving. I would totally understand why Lively got so angry when the paparazzi showed up at her house, but I will leave this for others to decide. Was Lively wrong for getting angry?

## **Nicki Minaj Fans Come for Famous YouTuber Kimberly Nicole Foster**

Now when I heard about this I was very shocked and I think everyone else would be shocked to hear this as well. Let's just start by saying that Nicki Minaj fans came for famous YouTuber Kimberly Nicole Foster. These Nicki fans have gone wild, they posted all of Kimberly Nicole Foster's personal information. I would not tolerate this if I were her. Kimberly Nicole Foster plans to take legal action against Nicki fans who posted her personal information. Foster plans to file a lawsuit against these fans as soon as possible.

Kimberly got so angry at the Nicki fans who posted her personal information that it led to her taking legal action against them.

Nicki fans known as "the Barbz" threatened to kill Kimberly for criticizing their favorite rapper. After this, Foster posted a tweet saying, "Nicki is clearly a horrible person. Negatively sticks to her like glue. Idk if we've ever seen this before." I was expecting Nicki to say something about this, but she said

nothing. It was all the Barbz who came for her telling her all types of horrible things. It was after these messages that Foster got exhausted and filed a report.

### **Trisha Paytas Goes into Labor**

I think Trisha Paytas has gone crazy for what she named her newborn child, but who am I to say that? I will leave that up to others to decide. YouTuber Trisha Paytas posted on social media that she went into labor at the same time as the whole world was learning that Queen Elizabeth II had passed away. After Trisha Paytas had her child, there were rumors going around that she had named her kid Elizabeth. Is this a coincidence? Although these were only rumors, everyone was talking about it. Paytas ended up naming her child Malibu Barbie. Some people on social media are saying that this is a weird name, but Paytas' love for pink and Barbie blonde hair led to this. Paytas even has Barbie blonde hair herself and is almost always wearing the color pink. Because of this, I wouldn't be surprised if Paytas named her child what she named her.

This is some drama with these celebrities people love so much. Let's see what people think about them now. Will their opinions change?

# 2022 NBA DRAFTS

By Xavier Mendez and Aryez Maldonado

---

We are writing to tell you about the latest draft pick and about future games that are going to happen. We are also writing to tell you about the three most popular NBA teams. The three teams are the Los Angeles Lakers, The Boston Celtics, and the Chicago Bulls. They are the three best teams in the league. Did you know that most players that are usually drafted, are normally in high school as a senior or in college? There are usually not a lot of grown adults that are normally picked to be on a team unless they're good.

We're going to start off by telling you about the Los Angeles Lakers picks. In this year's draft picks the Lakers chose to pick Max Christie. The Lakers chose to pick him because "Anthony Davis and Russel Westbrook are poor three-point shooters, and LeBron can be streaky at times if it's a good game." If the trio wants to find success, they need another big man whose stats are good and who can take the tough assignment on the defensive end. They also picked Max because Davis missed half the season and LeBron played 56 games so they can't assume that they are fully healthy, so they tried to snag another big man to eat up the front-court minutes.

Now we are going to write about the Boston Celtics draft picks of 2022. In this year's pick, the Boston Celtics decided to pick JD Davidson. JD is a gifted athlete who isn't afraid to pass the ball, JD is "A highly regarded point guard with great speed, quickness, and some real talent as a passer, JD Davison had some impressive moments as a true freshman at Alabama amid some growing pains as faced a steep learning curve in the SEC. Considered one of the top-15 prospects in the high school class of 2021 following his senior year at Calhoun High School (AL) in the small town of Letohatchee, Davison opted to stay close to home and play for Head Coach Nate Oats at Alabama."

"JD is measured standing 6'2.5 in shoes with a 192-pound frame and a 6'6.5 wingspan at the 2022 NBA Draft Combine, Davison has prototypical dimensions for a point guard to go along with an impressive combination of speed and explosiveness. Playing mostly on the ball when he was on the floor as a freshman, Davison operated regularly out of ball screens, pushed the ball aggressively in the open floor, and showed the ability to get downhill without a screen. Passing the ball unselfishly with some creativity, he had many positive moments using his explosiveness to create for others and to play above the rim but also had persistent issues with turnovers, has room to improve as a ball handler, and is still coming into his own as a scorer."

The final team we're going to tell you about is the Chicago Bulls. The draft pick this year they chose to pick Dallen Terry. The reason they chose to pick Dallen is because of his amazing three-point shooting abilities on the court. They also chose him because of his abilities on defense. That's our article about the latest NBA picks/drafts.
