

Antietam Virtual Academy Technology Page

For the 2019-2020 School Year, each student in the Antietam Virtual Academy will be receiving a new Lenovo 14E Chromebook that they will be able to take home. Our school district is always searching for the newest and most up to date models. Your child will have access to the full Google Suite Applications of Word, Excel and PowerPoint to submit digital assignments on this model of computer.

Should technology issues arise please reach out to Mr. Williams. Your Chromebook can be brought into the school and replaced the same day with a loaner until your technology issue is addressed by our Tech team. If an issue would come up over the weekend you could always find an alternative internet source until school opens on that Monday. Technology issues will not count against your child's attendance if they can't physically log on with a legitimate technological concern.
